Heavy rain showers	Heavy rain showers	Light rain	Sunny intervals	Cloudy	Cloudy
Precipitation probability					
40%	30%	20%	20%	10%	30%

Forecast for Wednesday 29 Jun 2022

Weather: Low cloud and outbreaks of rain at first soon clearing. A blustery and showery day follows, and rather cloudy, although some brief brighter or sunny spells are possible in-between any showers. Showers potentially turning heavy around midday, with the odd rumble of thunder possible, but likely turning drier across most hills through the afternoon.

Chance of cloud-free hill tops above 800m: 20% at first but increasing to around 90% by midday.

Low Cloud and visibility: Cloud obscuring hills above 500m at first, but lifting above most summits though the morning. A few ragged patches of cloud returning above 800m during any heavy showers. Otherwise good views expected outside of any rain, with reasonably distant hills visible. Visibility falling to poor to moderate in any rain though.

Freezing Level*	2200m	2100m	2100m	2000m	1900m	1900m	1900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early rain should quickly clear, and whilst sunny spells will be limited, there will still be a low risk of sunburn. Waterproof layers will be needed with the risk of showers. Very isolated thundery showers are also possible, although these are only a low risk. Should these occur, then it is recommended to descend off and away from exposed or steep ground.

Forecast for Thursday 30 Jun 2022

Weather: Cloud thickening through the early hours, with a chance of rain for a time, clearing shortly after dawn. Sunny spells then developing, but also showers. These heavy at times, but only a low risk of thunder and lightning. Showers are likely to ease during the afternoon with some warm sunshine developing.

Maximum wind: Southwesterly 10-15 mph. Chance of isolated gusts 20-30mph near any heavy showers.

Chance of cloud-free hill tops above 800m: 30% at first, improving to 90% during the day.

Low Cloud and visibility: Areas of cloud at 600m during the early hours, lifting above the summits through the, but ragged patches returning above 800m during heavy showers. Otherwise good to very good views, with distant hills visible but becoming moderate to poor in any heavy showers.

Temperature: **Valleys:** Plus 8 Celsius rising to Plus 15 Celsius
At 800m: Plus 6 Celsius rising to Plus 9 Celsius
Freezing level: Above the summits.
